Development Showcase

May 2023

PivotPoint

Digital brochure site and lead generation service for a full-service user experience design agency. The goal of this site was to showcase our team's services, provide a platform for new case studies and articles, and represent our refreshed brand with stark, invigorating colours and delightful micro-interactions throughout the site.

**Check it out at:**

Modica Group

Large-scale marketing site for a digital SMS platform with a wealth of solution landing pages, product overviews, and industry case studies. I was not responsible for the full site build, but I assisted the marketing team on tricker aspects of development – CMS collections setup, mega-menu interactions, and other dynamic or animated content.

⧉ modicagroup.com *(archive)*

The Webflow site I worked on has been replaced since I left the Modica team.
*This link is using the Internet Archive – not all links or images may work as expected!*
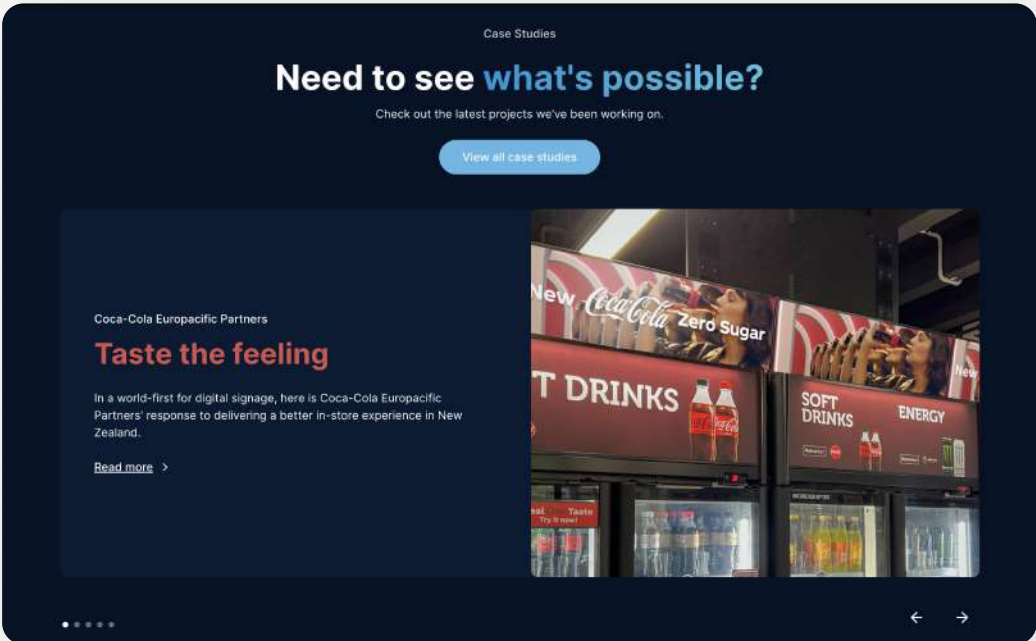

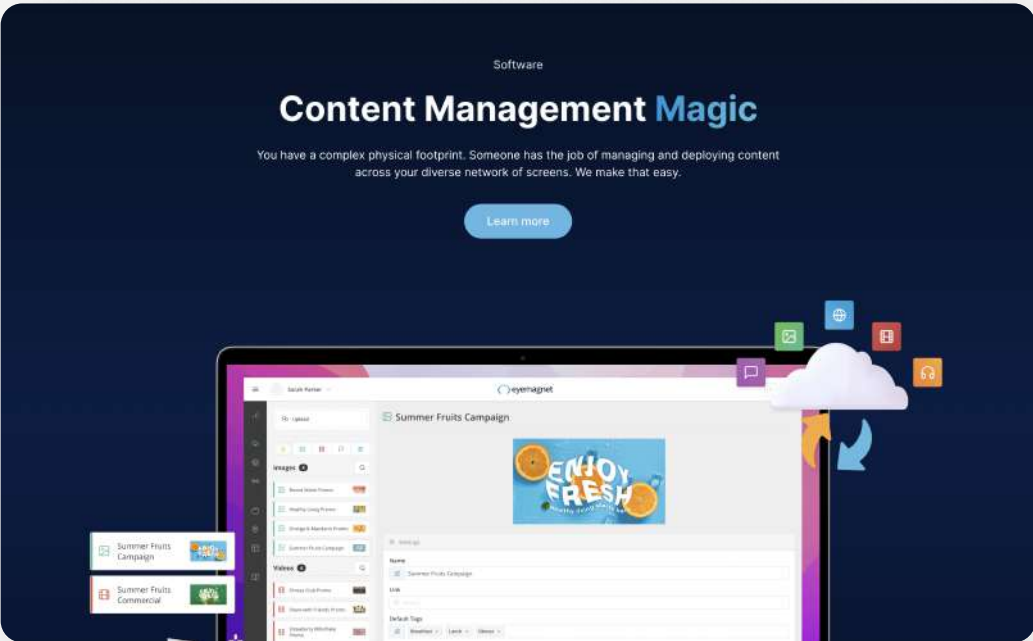

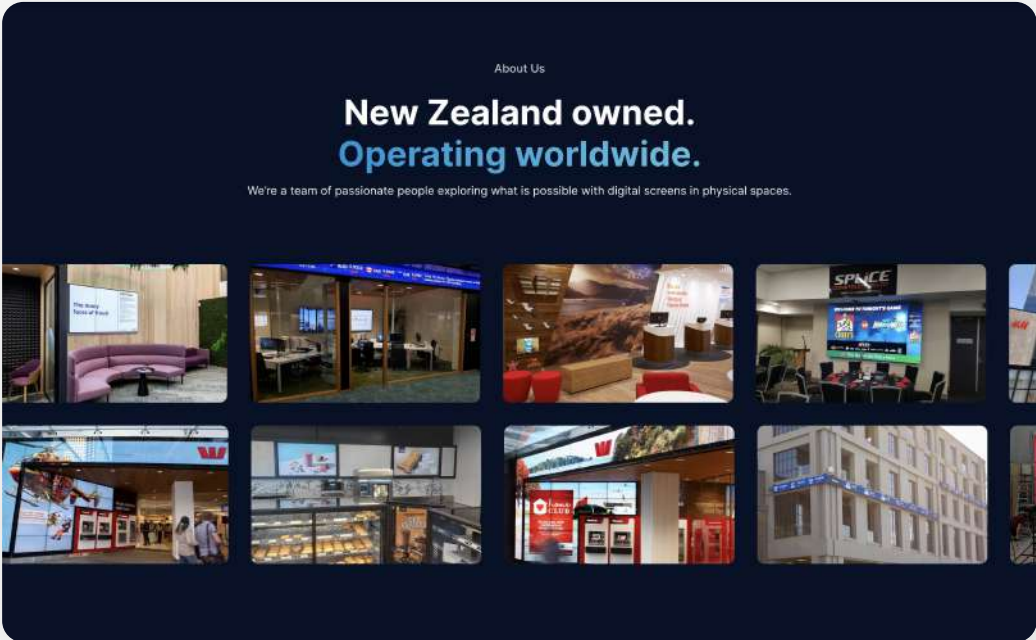

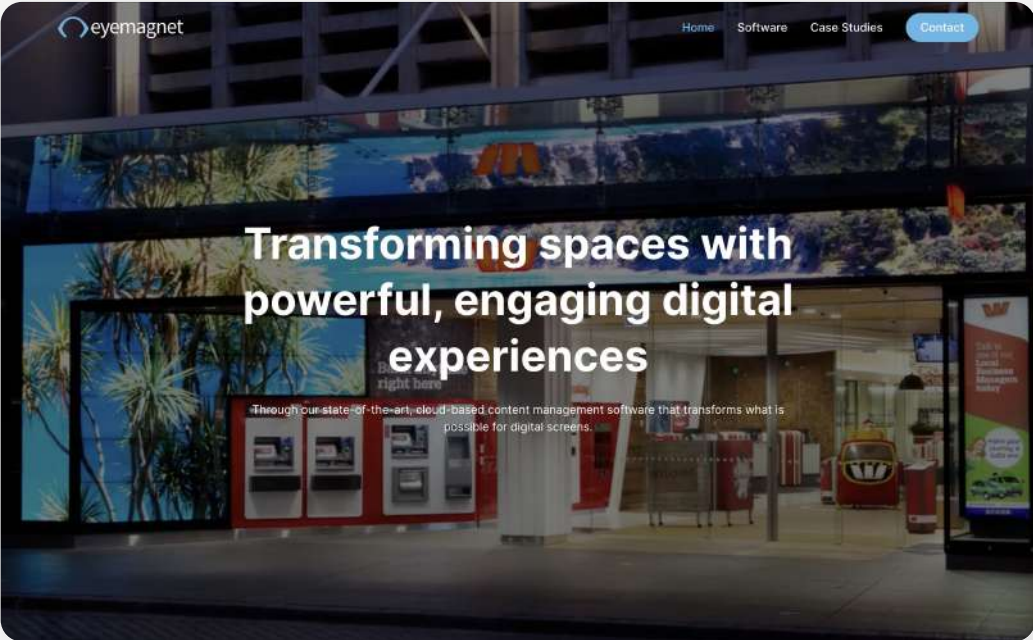

Eyemagnet

Digital signage solution provider, offering bespoke digital installations and an online content management tool. For this site we wanted our custom installations to really shine throughout the site – and so I built a simple and elegant experience to showcase recent work with the ability to continually update this with new case studies.

Ponatahi House

An interactive, online real-estate tour. My client wanted viewers to be able to experience the stunning beauty of the property and surrounding areas, and unearth the rich history inside. This was one of the most image-dense projects I've ever worked on, and it was really exciting developing all the imaginative ways we could display this beautiful house.

Chandler Heath Design

I maintain my own online portfolio for my career in product, UI/UX, and web design – and naturally, I build maintain this using Webflow. I love being able to use Webflow's tools to manage the templated delivery of project write-ups. I also use my own site to test out features I'm itching to create, such as a light/dark mode toggle or Lottie animations.
